## Number Writing 0 - 20

**Directions:** Trace each number below. Then write it again in the space below the number.

Note: A fun activity providing additional skills in number memorization can be used by doing the following:

- 1) Tell students to use their "Eagle Eye" and point at the number 12. When all students locate the number say – "Trace it."  
Do this with as many numbers as you would like. Be sure to remind students "where" to place their pencil first.
- 2) Another fun activity teaching which teaches additional important Kindergarten skills can be done as follows:  
Tell students to point to the number "after" 10 – or "before" 17 – etc. When the class does this say – "Trace it."
